Deygen, M. F.
THE THEORY OF MAGNETIC PROPERTIES OF
METAL-AMMONIA SOLUTIONS (Teoriya Magnitnykh
Svoystv Metali-ammiachnykh Rastvorov). Nov 60
[17]p. 11 refs.
Order from LC or SLA mi\$2.40, ph\$3.30 AEC-tr-4257

Trans. in manuscript of Zhurnal Eksperimental'noy
Teoreticheskoy Fiziki (USSR) 1954, v. 26,
p. 293-299.

On the basis of evidence concerning local electronic
centers in ionic dielectrics (polarons, color centers
and double color centers) a theory of magnetic prop-
erties of metal-ammonia solutions has been devel-
oped. Equilibrium concentrations and coefficients of
magnetic susceptibility have been determined. The
coefficient of magnetic susceptibility for the solution,
as a function of temperature and metallic atom con-
centration, has also been calculated. The results of
this theory have been confirmed by the corresponding
experiments. (Author)

1960, v. 27, Dec, p. 479-503.

DESCRIPTORS: *Hormones, *Testosterone,
Metabolism, Physiology.

Critical analysis of the methods of investigations of
the effects of anabolic hormones and their respective
properties makes it possible to demonstrate their
trophic action expressed among other things by effects
on nitrogen balance or on weight gain. This study also
demonstrates the possibility of an experimental disso-
ciation of the anaabolic action of the sexual effects;
(Biological Sciences--Pharmacology, TT, v. 6, no. 11)
